Professional Summary

Frontend Web Developer with hands-on experience building React.js applications in production and internship environments. Strong in JavaScript, modern UI development, and REST API integration, with a focus on clean, reusable components and responsive design. Currently developing full-stack skills and gaining practical familiarity with Node.js and backend development.

Technical Skills

Programming Languages: JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Bootstrap, Tailwind CSS

Tools & Technologies: Git, GitHub, Postman, VS Code, SQL Server, MySQL

Core Concepts: RESTful APIs, Responsive Design, OOP, Data Structures & Algorithms

Currently Learning / Familiar With: Node.js (Express), Angular, TypeScript, Unit Testing

Professional Experience

IT Officer (Frontend / Web Developer) | Egyptian Army | May 2024 – Apr 2026

- Maintained and improved internal React.js web interfaces used in daily operations.
- Developed responsive UI components with modern React and CSS, focusing on clean layout and usability.
- Integrated RESTful APIs on the frontend, handling loading states, errors, and data display.
- Participated in planning and reviewing tasks with the team, following clean code and best practices.
- Supported teammates by helping debug issues and sharing frontend knowledge.

Full Stack Developer Intern | SMART Technological Solutions | Oct 2022 – Apr 2023

- Contributed to building a landing page and simple web features using React.js and basic Node.js (Express).
- Built reusable UI components and implemented routing to create smooth navigation.
- Learned and applied Git-based workflows, including branches, commits, and pull requests, while collaborating with the team.
- Practiced integrating APIs and improving responsiveness and layout on the frontend.
- Focused heavily on learning modern web development, code organization, and best practices during the internship.

Projects

YouTube Clone | React.js

- Built a YouTube-style video browsing interface with search, categories, and dynamic routing between pages.
- Consumed a public REST API to load video data and used state to handle loading, errors, and UI updates.
- Focused on reusable components and clean layout to practice real-world frontend architecture.

LMS Website (Learning Management System) | React.js, Tailwind CSS

- Developed a responsive LMS frontend with pages for courses and authentication using Clerk.
- Designed a scalable component structure and layout ready for future backend integration and role-based features.

Education & Languages

Bachelor of Science in Computer & Artificial Intelligence

Arabic: Native

El Mansoura University, Egypt | Feb 2019 – Jul 2023

English: Advanced
